OUR FOUNDERS

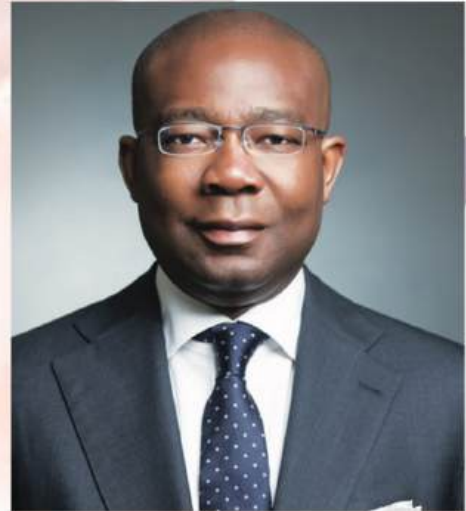

Mr. Aliko Dangote CON

Aliko Dangote is the founder and president/chief executive of the Dangote Group, the largest conglomerate in West Africa. The Group currently has a presence in 17 African countries and is a market leader in cement on the continent. One of the Group's subsidiaries, Dangote Cement Plc, is the largest listed company in West Africa and the first Nigerian company to join the Forbes Global 2000 Companies list.

The Group has diversified into other sectors of the Nigerian economy including agriculture and is currently constructing the largest petroleum refinery, petrochemical plant and fertilizer complex in Africa.

Internationally, Dangote sits on the board of the Corporate Council on Africa and is a member of the Steering Committee of the United Nations Secretary-General's Global Education First Initiative, the Clinton Global Initiative, the McKinsey Advisory Council, and the International Business Council of the World Economic Forum.

Mr. Aigboje Aig-Imoukhuede FCIB, CON

Aigboje Aig-Imoukhuede is the Founder and Chairman of Africa Initiative for Governance (AIG), a not-for-profit organisation, established to be a catalyst for high public sector performance in Africa by bringing proven private sector innovation, leadership and funding to the public sector in a private-public partnership to attract, inspire and support future leaders of Africa's public sector.

Mr. Aig-Imoukhuede is also the Founder and Chairman of Coronation Capital Limited, an Africa-focused private equity and proprietary investment firm established in 2014. Prior to this, he was Group Managing Director and Chief Executive Officer of Access Bank Plc, where he led the transformation of the bank to rank amongst Africa's leading banks.

CALL TO ACTION

Zouera Youssoufou

MD/CEO, Aliko Dangote Foundation

As the Director of ABCHealth and MD/CEO of the Aliko Dangote Foundation, I am honored to welcome you to the ABCHealth HealthTech Summit, a flagship event that embodies our shared commitment to harnessing the power of technology to drive transformative change in healthcare. From a development perspective, the intersection of health and technology holds potential for addressing some of the world's most pressing challenges. In many parts of the world, healthcare systems are strained, and access to quality care is limited. Digital health technologies offer a beacon of hope, enabling us to bridge gaps, improve outcomes, and enhance the overall well-being of individuals and communities.

At the Aliko Dangote Foundation, we've seen firsthand the impact that digital health can have on people's lives. From telemedicine platforms that connect patients with doctors across vast distances, to mobile health apps that empower

patients with doctors across vast distances, to mobile health apps that empower individuals to take control of their own health, technology is revolutionizing the way we approach healthcare. By leveraging these innovations, we can improve health outcomes, reduce disparities, and enhance the overall quality of life for millions of people.

The ABCHealth HealthTech Summit provides a unique platform for stakeholders from across the development spectrum to come together, share knowledge, and co-create solutions that can drive lasting impact. Over the course of this summit, we will explore the latest trends, best practices, and innovative solutions shaping the future of healthcare. From discussing the potential of artificial intelligence in healthcare to exploring the role of data analytics in population health management, our agenda is designed to spark meaningful conversations, foster collaboration, and inspire action.

As a leader in the development space, your participation in the ABCHealth HealthTech Summit is crucial to driving meaningful progress in the healthtech sector. Your expertise, experience, and insights will be invaluable in shaping the future of healthcare and ensuring that digital health technologies are harnessed to meet the needs of the most vulnerable populations.

By joining us at the summit, you will have the opportunity to engage with industry experts, share your own experiences, and network with peers and potential partners. You will also have the chance to contribute to the development of sustainable and scalable digital health solutions that can drive lasting impact in the healthcare sector. We believe that the ABCHealth HealthTech Summit has the potential to be a game-changer for the healthtech sector. By bringing together stakeholders from across the development

spectrum, we can unlock new opportunities for growth, innovation, and impact. We can drive meaningful progress in the healthtech sector and shape the future of healthcare.

I urge you to join us at the ABCHealth HealthTech Summit and be part of this exciting journey. Together, we can harness the power of technology to drive transformative change in healthcare and improve the lives of millions of people. Let us work together to create a brighter, healthier future for all. The summit's impact will be felt far beyond the event itself, as attendees go on to implement new solutions, drive innovation, and shape the future of healthcare. By participating in the summit, you will be contributing to a broader movement that seeks to harness the power of digital health to drive transformative change in healthcare.

As we gather to share knowledge, showcase cutting-edge solutions, and forge new partnerships, we're reminded that the work we do today will shape the healthcare landscape of tomorrow. At the Aliko Dangote Foundation, we're committed to driving this transformation, leveraging our expertise, resources, and network to enable a more connected, responsive, and sustainable healthcare ecosystem.

As we move forward, we're guided by a shared vision of a healthcare system that is more responsive, more resilient, and more equitable. A system that leverages technology to improve outcomes, enhance patient experiences, and foster a culture of innovation and continuous improvement. This vision is not just aspirational; it's also pragmatic. I look forward to welcoming you to the ABCHealth HealthTech Summit and working together to create a brighter, healthier future for all. Let us harness the power of technology to drive meaningful progress in the healthtech sector and shape the future of healthcare.

ABOUT INFORMA MARKETS

Informa Markets stands as a global leader in creating dynamic platforms that facilitate trade, innovation, and growth across a multitude of specialized industries. By orchestrating face-to-face exhibitions, delivering targeted digital services, and providing actionable data solutions, Informa Markets connects buyers and sellers in over a dozen global verticals, including pharmaceuticals, healthcare, boating, and infrastructure. As the world's foremost market-making company, it breathes life into a diverse array of specialist markets, unlocking opportunities and fostering continuous development throughout the year.

In the healthcare sector, Informa Markets is dedicated to fostering collaboration and progress in the ever-evolving landscape of human health. By connecting manufacturers with distributors worldwide and empowering practitioners to enhance patient outcomes, the company is committed to facilitating deeper learning, building robust relationships, and supporting informed decision-making across the industry. With a comprehensive network comprising 12 in-person exhibitions and 90 conferences, complemented by editorial expertise and year-round opportunities for engagement, Informa Markets has cultivated a global community of over 570,000 healthcare professionals, all united in the pursuit of a healthier world.

A notable event of Informa Markets' healthcare portfolio is the annual Arab Health exhibition (**now World Health Expo, Dubai**) and congress, held in Dubai, United Arab Emirates. Since its inception in 1975, Arab Health has evolved into one of the world's largest medical conferences, attracting healthcare industry representatives from the Middle East, Asia, Europe, and the United States. The event is supported by key regional health authorities, including the UAE Ministry of Health, the Abu Dhabi Health Authority, the Dubai Health Authority, and the Dubai Healthcare City Authority. Arab Health serves as a premier platform for showcasing the latest innovations in medical technology, providing a forum for knowledge exchange, and facilitating business partnerships that drive the industry forward.

Informa Markets' commitment to advancing healthcare extends beyond large-scale exhibitions. The company has formed strategic partnerships to enhance the scope and impact of its events. Notably, Informa Markets has joined forces with the Healthcare Information and Management Systems Society (HIMSS) to expand the annual HIMSS Global Health Conference & Exhibition. This collaboration aims to redefine the healthcare conference experience, fostering long-lasting community growth and engagement among healthcare providers, technology professionals, and other stakeholders across the global health ecosystem.

Tom Coleman

Portfolio Director, Informa Markets

In the Middle East, events such as WHX Labs Dubai and the Patient Safety Conference complement Arab Health, focusing on laboratory medicine and healthcare quality, respectively. In Asia, Medlab Asia and Asia Health, now (**WHX Labs Dubai**) cater to the growing demand for medical laboratory and healthcare solutions in the region. Africa hosts events like Africa Health and Medic West Africa, which serve as pivotal platforms for healthcare professionals to explore the latest advancements and collaborate on improving healthcare delivery across the continent. In the Americas, events such as the Florida International Medical Expo (FIME) and Hospitalar in Brazil provide comprehensive forums for the medical industry to engage in trade, education, and networking.

Beyond organizing events, Informa Markets leverages its in-depth industry knowledge and extensive networks to offer media and marketing solutions that support the healthcare community year-round. Through platforms like Omnia Health Insights and Omnia Health Magazine, the company delivers exclusive content, including insights, interviews, opinion pieces, and in-depth reports, keeping healthcare professionals informed about the latest developments and trends in the industry. These resources are invaluable for professionals seeking to stay abreast of innovations and best practices that can enhance patient care and operational efficiency.

Informa Markets' commitment to strengthening connections within the healthcare industry is further exemplified by its efforts to support the community with exclusive insights, opinion pieces, reports, and updates. The company's in-depth data, wide-reaching content, and industry expertise enable it to craft bespoke digital marketing activities for clients, whether they aim to enhance their physical presence at events, nurture new relationships, or explore new territories. This comprehensive approach ensures that stakeholders across the healthcare spectrum have access to the information and connections they need to thrive in a rapidly changing environment.

WHX: Mapping the Global Pulse of Health Innovation

WHX Lagos

Formerly Medic West Africa

The World Health Expo in Lagos, Nigeria brings together exhibitors, speakers, and attendees from across West Africa and beyond, focusing on key areas like medical equipment, laboratory technology, diagnostics, and digital applications.

WHX Nairobi

Formerly Medic East Africa

The World Health Expo in South Africa, Cape Town is scheduled to hold in September 2025 and will display latest medical products and technology across the world.

WHX Cape Town

Formerly Africa Health

As East Africa's core healthcare event, World Health Expo Nairobi attracts more than 7,000 top medical professionals from the region and the world converging in October 2025.

WHX Dubai

Formerly Arab Health

The World Health Expo in the UAE brings together influences, decision makers, business leaders, innovators and governments from all major disciplines to advance the business of Healthcare.

FOREWORD

The African continent is at a moment, where deep-rooted challenges in health systems collide with the momentum of innovation. The COVID-19 pandemic accelerated our collective realization that the future of health will not be built solely in clinics or hospitals, but across interconnected platforms driven by data, powered by technology, and sustained through collaboration. It is against this backdrop that we convene the ABCHealth Digital Health & AI Conference as part of the World Health Expo in Lagos; an intentional convergence of vision, technology, and purpose.

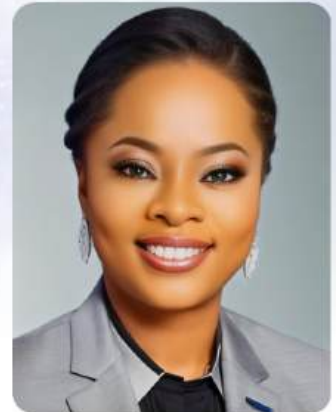

This gathering is a manifestation of our conviction that Africa can no longer afford to remain on the periphery of global digital transformation. We must lead our own narrative—one that centers African ingenuity, contextual understanding, and solution-driven action.

Artificial intelligence and digital technologies are no longer abstract possibilities; they are current realities shaping diagnostics, streamlining patient pathways, decentralizing care, and offering new paradigms for disease surveillance, precision health, and health system optimization. But the true power of these tools lies not just in their application, but in their ability to democratize access, to reduce inequality, and to reimagine healthcare for the most underserved.

At ABCHealth, our mandate is clear: to mobilize the power of the private sector in advancing equitable, resilient, and sustainable health systems across Africa. Yet, we recognize that no one actor, public or private, can drive systemic transformation in isolation. That is why this conference is designed to foster a shared platform where thought leaders, innovators, policymakers, investors, funders, and development partners come together not merely to dialogue, but to co-create, co-invest, and co-implement scalable digital health interventions. The conversations and outcomes of this conference will serve as the foundation for partnerships that go beyond transactions and lean into long-term, systems-oriented collaboration.

The summit will feature a range of exciting events, including the CAMA Malaria & Tech Workshop on June 2nd, which will bring together experts and stakeholders to explore innovative solutions for tackling malaria in Africa. This workshop is a crucial step towards harnessing technology to combat one of the continent's most pressing health challenges.

On June 3rd, the ABCHealth Digital Health & AI Conference will showcase the latest advancements in digital health and artificial intelligence, highlighting the potential of these technologies to transform healthcare delivery. This conference will provide a

Dr. Mories Atoki
CEO, ABCHealth

platform for experts to share their knowledge, experiences, and insights on the application of AI in healthcare.

Also on the June 3rd, we will launch the ABCHealth Virtual HealthTech Hub, a cutting-edge platform designed to facilitate collaboration, innovation, and knowledge-sharing among stakeholders across the health ecosystem. This hub will provide a virtual space for innovators, entrepreneurs, and healthcare professionals to connect, share ideas, and co-create solutions. On June 4th, the ABCHealth Xcelerator Pitch Program will provide a platform for startups and innovators to showcase their solutions, pitch to investors, and compete for funding and support. This program is designed to accelerate the growth of innovative healthtech solutions and drive meaningful impact in the healthcare sector.

As we embark on this journey, we recognize that the path forward will require perseverance, creativity, and a willingness to challenge the status quo. By engaging the digital health ecosystem and prioritizing interoperability, scalability, and sustainability, we can unlock new opportunities for growth, innovation, and impact. This summit is a crucial step in this direction, and I have no doubt that the conversations, connections, and collaborations forged here will yield tangible results and lasting impact.

In closing, I'd like to express my deepest gratitude to our partners, speakers, and attendees for their contributions to this summit. Your collective expertise, passion, and commitment to advancing digital health are the driving forces behind this movement, and I'm honored to be part of this journey. Together, let's harness the power of technology to create a brighter, healthier future for all.

THE ABCHEALTH HEALTHTECH SUMMIT

The banner for the ABCHealth HealthTech Summit is a horizontal strip with a light blue background. On the left, the 'informa markets' logo is in green. Next to it, the 'ABCHealth Healthtech SUMMIT' logo is in large, bold, black and red letters. To the right of the summit logo is the 'WHX' logo in green, with 'WORLD HEALTH EXHIBITION LAGOS' and 'Formerly Medic West Africa' in smaller text below it. A central timeline bar shows four events: 'CAMA MALARIA & TECH WORKSHOP' (JUN 2), 'DIGITAL HEALTH & AI CONFERENCE' (JUN 3), 'VIRTUAL HEALTH TECH HUB LAUNCH' (JUN 3), and 'ACCELERATOR PITCH PROGRAM' (JUN 4). On the right side, the 'ABCHealth' logo is in black. Below it, the 'Theme' is 'Engaging the Digital Health Ecosystem: Enabling Interoperability, Scalability & Sustainability across Health Systems'. The dates '2-4 June 2025' and time '9am WAT (Daily)' are shown. The location is 'Landmark Event Centre, Victoria Island, Lagos'. A small photo of a woman is on the far right. At the bottom, a row of logos includes ABCHealth, Abika Dangote Foundation, access, TGI, UNH, UNAIDS, Splat, CAMA, Abika Dangote Foundation, access, ExxonMobil, envu, DCL, VESTERGAARD, and syngenta.

As we gather at the ABCHealth HealthTech Summit, held at the esteemed World Health Expo, we find ourselves at the nexus of a profound transformation in healthcare. The convergence of technology and medicine has given rise to a new era of innovation, one that promises to revolutionize the way we approach patient care, disease prevention, and health management. At ABCHealth, we've long been committed to harnessing the power of digital health to improve outcomes, enhance patient experiences, and foster a more responsive and resilient healthcare system.

The theme of this year's summit, "Engaging the Digital Health Ecosystem: Enabling Interoperability, Scalability, and Sustainability across Health Systems," speaks directly to the complexities and challenges of our time. As healthcare becomes increasingly digitized, the need for seamless data exchange, scalable solutions, and sustainable models has never been more pressing. This summit is a reflection to ABCHealth's dedication to addressing these challenges head-on, fostering a culture of innovation, and driving meaningful progress in the healthtech sector.

The digital health ecosystem is characterized by a vast array of stakeholders, including healthcare providers, technology companies, policymakers, and patients. Each of these groups brings unique perspectives, needs, and challenges to the table. By engaging this diverse ecosystem, we can unlock new opportunities for collaboration, innovation, and growth. The ABCHealth HealthTech Summit provides a unique platform for stakeholders to come together, share knowledge, and co-create solutions that can drive lasting impact.

One of the key challenges facing the digital health ecosystem is the issue of interoperability. As healthcare data becomes increasingly digitized,

the need for seamless data exchange between different systems, providers, and payers has never been more pressing. By enabling interoperability, we can improve care coordination, reduce medical errors, and enhance patient outcomes. This summit will explore the latest strategies and solutions for achieving interoperability, including the use of application programming interfaces (APIs), data standards, and cloud-based platforms.

Scalability is another critical challenge facing the digital health ecosystem. As digital health solutions become increasingly sophisticated, the need for scalable models that can be replicated and adapted across different settings has never been more pressing. By developing scalable solutions, we can accelerate the adoption of digital health technologies, improve healthcare outcomes, and reduce costs. This summit will showcase innovative solutions that have achieved scale, including telehealth platforms, mobile health apps, and artificial intelligence-powered diagnostic tools.

Sustainability is also a key consideration for the digital health ecosystem. As digital health solutions become increasingly complex, the need for sustainable business models that can support long-term growth and adoption has never been more pressing. By developing sustainable models, we can ensure that digital health solutions remain viable and effective over time, driving lasting impact and value for patients, providers, and payers. This summit will explore the latest strategies and solutions for achieving sustainability, including value-based care models, data analytics, and innovative financing mechanisms. In conclusion, the ABCHealth HealthTech Summit represents a decisive moment in the evolution of digital health. By bringing together stakeholders, we can drive meaningful progress, and shape the future of healthcare.

CAMA

Corporate Alliance on Malaria in Africa

MALARIA & TECH WORKSHOP

JUN 2 2025

Meeting Room 2A
Landmark Event Centre, Lagos.

THE CONCEPT NOTE

Theme: Deepening Public Private Partnerships for Malaria Elimination

Topic: Mobilizing Corporate Resources and Private Wealth for Sustainable Malaria Solutions, Leveraging Technology.

BACKGROUND

Malaria remains one of the most significant public health challenges in Africa, affecting millions of people and impeding socio-economic development across the continent. Despite significant progress in malaria control over the past two decades, the disease continues to pose a substantial burden, particularly in sub-Saharan Africa, where the majority of malaria cases and deaths occur. The World Health Organization (WHO) estimates that in 2023, there were approximately 263 million cases of malaria globally, with Africa accounting for 94% of these cases.

In response to this ongoing challenge, the African Union's Agenda 2063 envisions a continent free from the burden of malaria and other communicable diseases. Agenda 2063 emphasizes the importance of health as a cornerstone for sustainable development and recognizes the critical role of partnerships in achieving health-related goals. The African Union has set ambitious targets for malaria elimination, aiming to reduce malaria morbidity and mortality by 90% by 2030, and ultimately eradicate the disease by 2063. The Corporate Alliance for malaria in Africa (CAMA) boldly to accepts this challenge and is collaboratively embarking on working with all key stakeholders to achieve this ambitious target.

The Role of Public Private Partnerships

Public private partnerships (PPPs) are increasingly recognized as vital mechanisms for mobilizing resources, expertise, and innovation in the fight against malaria. The private sector possesses unique capabilities, including financial resources, technological advancements, and operational efficiencies, which can complement public health efforts. By fostering collaboration between

governments, non-governmental organizations, and private entities, we can create sustainable solutions that leverage the strengths of each sector.

In the light of this, ABCHealth's Corporate Alliance on Malaria in Africa (CAMA) is organizing an in person event on the sideline of Medic West Africa & Medlab West Africa 2025 at Landmark Centre, Lagos, Nigeria. The theme of this event, Deepening Public Private Partnerships for Malaria Elimination: Mobilizing Corporate Resources and Private Wealth for Sustainable Malaria Solutions will seek to explore how corporate resources and private wealth can be mobilized to support malaria elimination efforts.

This event will serve as a platform for stakeholders from various sectors to share best practices, discuss innovative financing mechanisms, and identify opportunities for collaboration. By fostering collaboration between public health entities, the private sector, and philanthropic organizations, we can develop actionable strategies that enhance investment in malaria control initiatives and ensure the sustainability of these efforts.

Objectives

1. Highlight Successful Models of PPPs
2. Mobilize Corporate Resources
3. Strengthen Collaboration
4. Align with Agenda 2063
5. Develop Actionable Recommendations: Generate a set of recommendations for enhancing public-private partnerships in malaria elimination.

AGENDA

TIME (WAT)	ACTIVITY/PERSONNEL
9:30am - 10:00am	ARRIVAL, REGISTRATION & NETWORKING
10:00am - 10:30am	TEA BREAK

Executive Secretary
National End Malaria Council

KEYNOTE ADDRESS

Dr. Peter Billingsley

Founder, The Vital Narrative

KEYNOTE SPEAKER (Virtual)

Dr. Kolawole Maxwell
-Director, West & Central
Africa
Malaria Consortium

Dr. Kolawole Maxwell offers extensive knowledge of primary health care and planning and managing health activities at community, facility and policy levels, having worked for over two decades as a Community Health Physician. Maxwell has expertise in patient care management, health systems strengthening, health sector reform management, institutional development, behavioural change communication, community engagement in health and malaria control. As Malaria Consortium's West and Central Africa Programmes Director, Maxwell provides support and oversight to all country directors in the region. He also leads Malaria Consortium's Nigeria Country Programme.

Dr. Ope Abegunde is a dynamic and accomplished development professional with dual postgraduate qualifications, a Master of Public Health (MPH) and a Master of Business Administration (MBA). With extensive senior-level experience, Dr. Abegunde has consistently demonstrated a strategic ability to set visionary goals and lead cross-functional, cross-sectoral teams in the design and execution of impactful public health policies and programs. Known for a collaborative leadership style and strong intersectoral engagement, Dr. Abegunde has successfully fostered partnerships across the public, private, and civil society sectors to drive sustainable health outcomes. Her expertise spans high-level advocacy, policy formulation, and program implementation—particularly in areas such as HIV, malaria, and public-private partnerships (PPPs).

Dr. Ope Abegunde
-Executive Secretary
National End Malaria Council

Dr. Peter Billingsley
Founder
The Vital Narrative

With over 35 years' experience as a global health executive, he is a seasoned expert in vaccinology, malaria transmission, and vector biology. Peter's contributions have significantly advanced tropical disease and public health, reflected in over 140 peer-reviewed publications and millions of dollars secured for laboratory research, clinical studies, and capacity-building projects. His career spans key positions in the private sector, where he was instrumental in driving malaria vaccine R&D, and academia, where he focused on medical and veterinary entomology and malaria transmission. This wealth of experience plus on-the-ground work across Africa and organizational leadership, allows him to offer insights and guidance from a place of deep expertise and practical understanding.

Dr. Francis Aminu

-Director, Health & Nutrition
Aliko Dangote Foundation

Dr. Francis Aminu is a Development Nutrition Specialist with more than 25 years of experience in program management and organizational development in the area of food security and nutrition, maternal and child health, sustainable agriculture, reproductive health, environment, and gender analysis. He has proven experience working effectively with various stakeholders, including government officials, donor agencies, development partners, civil society actors and clients with in-depth knowledge of the political, economic and socio-cultural characteristics of Nigeria and some countries in Africa. He has a demonstrable experience working effectively in transition, fragile and unsafe state environment, monitoring activity design, development, program start-up and implementation, close out and strategic experience transfer.

Nonye Egekwu is a Public health consultant and Healthcare Quality Improvement expert with deep experience supporting national, and subnational governments and ministries of health to improve evidence-based decision-making for healthcare. Her experience spans clinical care, strengthening national malaria eradication programs, Non-Communicable Diseases (NCDs), Healthcare Quality Improvement, maternal and newborn health, health financing, and optimizing healthcare service delivery in Africa. In addition, she has deep experience working across private and public health sectors, faith-based health institutions, and across all tiers of the healthcare leadership in Nigeria to strengthen health systems and improve health outcomes. As a technical facilitator on the National Coordination of Pandemic Responses Collaborative with countries in Africa and Asia enrolled, she facilitated country conversations with an aim to supporting national health managers to respond effectively to the COVID pandemic.

Nonye Egekwu

-Senior Advisor, Nigerian
National
CEmONC Program

Elijah Egwu

Malaria Tech Expert
Catholic Relief Services

Elijah is a trained professional in information and communications technology, an expert in humanitarian development, digital health, grant and project management with over 12 years working experience and still counting. A Master's Degree holder in Software Engineering, and a graduate of Physics BSc, a Microsoft Certified Professional, a certificate holder in Cyber Security from Kennesaw State University and Project Management from University of Washington, United States. Elijah has provided diverse ICT4D technical support, management and administration to public, private, Government and International Non- Governmental Organizations across several countries in within Africa and the Globe. He currently works for Catholic Relief Services (CRS) where he has in Nigeria and the Republic of Benin led the introduction of digitalization of public health campaign in Malaria, Vaccination and Neglected Tropical Disease.

James joined the Dangote Group to actively develop and implement a fit-for-purpose framework of a Group-wide Health and Safety Management System as part of the Group Health, Safety, Socials and Environmental Mgt. (HSSE) Integrated Management System. His scope of work covers strategic and operational support to the construction of a world-class Complex comprising the largest Refinery on a single train in the world and petrochemical plants based in Africa. His remit supports Cement manufacturing plants spread across the African Region. His work scope also extends to other manufacturing business units within the conglomerate (e.g. Sugar, Salt, Flour, Pasta, Agro sacks etc).

Dr. James Adenuga
-Group Chief HSSE &
Sustainability
(DIL)

Dr. Jennifer Anyanti
-Deputy Managing
Director, SFH Nigeria

Jennifer is an experienced, result oriented, highly creative, and self motivated professional with over 2 decades of solid experience in applying evidence based approaches to Health Systems Development in developing countries, as well as to Family Planning, MNCH and Reproductive Health programming. With over 20 years demonstrated experience with local and international organisations, she has been actively applying public health principles in core health areas, including Family planning, BCC/health communications, primary health care, HIV & AIDS and STI prevention & control, neglected tropical diseases and managed care in occupational health settings. She possesses exceptional management, coordination, supervision, data management, and report writing skills, and has been a member of the C-suite for over 7 years.

Rhoda Robinson is the Co-Founder of HACEY Initiative, she is an accomplished international development professional with over 15 years of expertise in designing and executing high- impact interventions. Proven dedication to addressing contemporary developmental challenges and fostering a healthy and sustainable society. Distinguished gender specialist with a primary focus on advancing gender equality, economic inclusion, and addressing gender-based violence. Deeply committed to championing equal access to healthcare, education, empowerment, and rights for women and girls, and promoting gender inclusive policies and programming. Her Key Competencies include: International Development, Public Health, Gender Equality, Gender-Based Violence, Economic Inclusion, Public-Private Partnerships, Data Visualization, Impact Assessment, Strategic Leadership, Technology Integration, Sustainability, Social Return on Investment.

Rhoda Robinson
-Co-Founder, HACEY

Rose Peters

Head, Vector Control
SSA, Syngenta

Rose Peter is the Commercial Head Vector Control Sub-Saharan Africa. She has over 20 years' experience in clinical research, market development and sales in the public health and veterinary fields for large, medium and small companies, specializing in the development of pharmaceuticals, anti- parasiticides and insecticides.

Dr. Shonde is a medical doctor and public health expert with over a decade of experience in designing, implementing, and overseeing large-scale health interventions in multiple countries and across sectors. He is currently a Technical Advisor on a global, multisectoral health project that focuses on malaria control via working with other sectors to address their contribution to the burden and leverage shared resources. He has supported and collaborated with digital experts in using, and overseeing the use of technology for large scale malaria interventions - like Insecticide Treated Nets (ITN) and Seasonal Malaria Chemoprevention (SMC) campaigns in Africa.

Dr. Akinola Shonde

-Technical Advisor
(Malaria & Multi-sectoral
Programming)
Catholic Relief Services

Dr. Anastacia Isodje

Technical Manager,
Bonny Malaria Elimination
Project
NLNG

Board certified public health physician, with over fifteen years work experience, providing advisory and technical guidance for public health projects to international organisations and multinational companies (USAID, WHO, DFID, UNICEF, Bill & Melinda Gates, Shell, Nigeria Liquefied Natural Gas LTD), spanning the three levels of healthcare delivery, leading to community health system strengthening and improved health outcomes

ABCHealth 

ABCHEALTH **DIGITAL HEALTH & AI** **CONFERENCE**

JUN 3 2025

WHX Main Room (Showfloor)
Landmark Event Centre, Lagos.

THE CONCEPT NOTE

The digital health ecosystem faces critical challenges in interoperability, scalability, and sustainability, limiting its impact on healthcare transformation. Fragmented health data, lack of standardized exchange frameworks, and siloed systems hinder seamless integration, with over 50% of digital health interventions in low- and middle-income countries failing to integrate effectively.

Scalability remains a hurdle, as 70% of digital health projects in Africa do not progress beyond pilot phases due to funding and infrastructure gaps. Sustainability is also at risk, with most governments allocating less than 1% of their health budgets to digital health despite an estimated \$4.2 billion annual investment needed. Addressing these barriers requires a coordinated approach through policy frameworks, public-private partnerships, and innovative financing to ensure longterm, equitable, and efficient healthcare delivery.

ABCHealth will host a Digital Health & AI Conference, titled "Engaging the Digital Health Ecosystem: Enabling Interoperability, Scalability & Sustainability across Health Systems," to foster dialogue among key stakeholders, including policymakers, healthcare providers, technology innovators, and private sector leaders, on advancing digital health integration. Through expert panel discussions, case study presentations, and collaborative sessions, participants will identify actionable pathways to enhance data-driven healthcare, strengthen health system resilience, and accelerate the adoption of AI and digital solutions for improved health outcomes across Africa.

The post-event ABCHealth Health Tech Virtual Hub will serve as a dedicated virtual platform to sustain these discussions, drive continuous knowledge exchange, and support the long-term implementation of digital health solutions across the continent.

BACKGROUND

The rapid evolution of digital health technologies is reshaping healthcare delivery across the globe, offering innovative solutions to enhance efficiency, accessibility, and quality of care. However, despite the growing adoption of digital health tools, the lack of interoperability, limited scalability, and challenges in ensuring long-term sustainability continue to hinder seamless integration into health systems. According to the World Health Organization (WHO), as of 2023, only 60% of countries have implemented national electronic health record (EHR) systems, and among those, fewer than 30% have achieved interoperability between different healthcare providers. The inability of digital health platforms to communicate effectively results in fragmented health data, duplication of efforts, and inefficiencies that undermine patient-centered care and evidence-based decision-making.

Interoperability challenges arise from the diverse landscape of health information systems, each designed with distinct architectures, data standards, and proprietary technologies. In many healthcare environments, particularly in LMICs, hospitals, clinics, and telemedicine platforms operate on independent digital systems that lack common data-sharing protocols. This siloed approach prevents seamless data exchange between providers, limiting the ability to track patient history, coordinate treatments, and implement population-wide health interventions. A 2021 study by the Healthcare Information and Management Systems Society (HIMSS) revealed that 64% of healthcare organizations in the U.S. reported issues with data exchange across different EHR platforms, even in regions with advanced health IT infrastructure. The situation is more pronounced in Africa, where only a handful of countries, such as South Africa and Kenya, have initiated nationwide health information exchanges to facilitate interoperability.

The consequences of poor interoperability extend beyond inefficiencies; they pose significant risks to patient safety and public health. The inability to consolidate patient records can lead to errors in diagnosis, redundant testing, and inconsistent treatment plans. For instance, a patient receiving care in multiple healthcare facilities may undergo duplicate laboratory tests due to the lack of a centralized health data repository, increasing healthcare costs and delaying treatment. The lack of real-time data sharing impedes disease surveillance and outbreak response. During the COVID-19 pandemic, health agencies worldwide struggled to aggregate and analyze patient data from disparate sources, delaying critical decision-making in resource allocation and public health interventions.

Scalability remains a challenge, especially in low- and middle-income countries (LMICs), where digital health solutions often start as pilot projects but fail to transition into nationwide implementation. The African Union's Digital Transformation Strategy for Africa (2020–2030) highlights that 70% of digital health initiatives on the continent do not scale due to inadequate funding, weak infrastructure, and misalignment with national healthcare policies. A report by the Global Digital Health Partnership (GDHP) further emphasizes that many digital health solutions are donor-driven, making them vulnerable to financial instability once initial funding ends. Without clear sustainability models, these solutions struggle to maintain operations, upgrade their systems, and support long-term digital transformation efforts in health systems.

One of the main factors limiting scalability is the digital divide, particularly in regions with inadequate internet penetration and unreliable electricity supply. According to the International Telecommunication Union (ITU), only 43% of Africa's population had internet access as of 2022, creating a significant barrier to the widespread adoption of digital health solutions. Many remote and underserved areas still rely on paper-based records due to the lack of digital infrastructure, further exacerbating the inefficiencies in health service delivery. Additionally, healthcare workers often face challenges in adopting new digital tools due to limited training and resistance to

change. A 2023 report by the African Digital Health Network (ADHN) found that 58% of healthcare workers in rural African health facilities were unfamiliar with basic EHR functionalities, highlighting the urgent need for digital literacy programs.

The financial constraints that limit scalability are compounded by the absence of sustainable business models for digital health solutions. Many health-tech startups and digital health programs rely on donor funding or short-term grants, which, once depleted, lead to the discontinuation of services. For example, the SmartCare EHR system, introduced in Zambia in 2005 with funding from the U.S. President's Emergency Plan for AIDS Relief (PEPFAR), initially saw widespread adoption. However, after donor support decreased, system maintenance and expansion stalled, leaving many health facilities without functional digital records. Addressing scalability challenges requires long-term investment strategies that incorporate government funding, private-sector participation, and innovative financing models such as public-private partnerships (PPPs) and outcome-based funding mechanisms.

The global push for AI-driven healthcare solutions adds another dimension to the digital health ecosystem. AI-powered diagnostics, predictive analytics, and telemedicine platforms have demonstrated significant potential in improving health outcomes. A 2022 study published in *The Lancet Digital Health* found that AI algorithms achieved diagnostic accuracy rates exceeding 90% in detecting diseases such as diabetic retinopathy and breast cancer. However, the widespread adoption of AI in healthcare is constrained by challenges related to data privacy, ethical considerations, regulatory frameworks, and the digital divide that limits access to AI-driven tools in resource-limited settings.

The ethical concerns surrounding AI in healthcare include bias in algorithmic decision-making, data security vulnerabilities, and the potential displacement of human healthcare workers. Studies have shown that AI models trained on biased datasets can perpetuate health disparities. For instance, a 2019 study in *Science* found that an AI-driven risk assessment tool used in U.S. hospitals systematically underestimated the severity of illness in Black patients compared to White patients, leading to unequal access to healthcare resources. Regulatory frameworks governing AI in healthcare remain fragmented, with some countries lacking comprehensive policies on AI-driven diagnostics and decision-support systems. The European Union introduced the AI Act in 2021 to establish clear guidelines for high-risk AI applications, but similar

regulatory structures are still in development in many parts of Africa and Asia. Ensuring sustainability in digital health requires an integrated approach that considers economic, technological, and governance factors. The World Bank estimates that LMICs will need an annual investment of \$4.2 billion to develop and maintain digital health infrastructure, yet most governments allocate less than 1% of their health budgets to digital health initiatives. Strengthening public-private partnerships, establishing regulatory frameworks, and fostering local capacitybuilding are crucial to ensuring that digital health solutions are not only implemented but also sustained in the long run.

Sustainability also depends on the ability to build resilient health information ecosystems that can withstand financial, technological, and operational disruptions. Many digital health solutions fail to endure beyond their initial implementation phase due to a lack of institutional ownership and policy alignment. Governments play a crucial role in driving sustainability by integrating digital health initiatives into national health strategies and ensuring that they receive continuous funding and support.

Capacity-building initiatives must be prioritized to equip healthcare workers with the skills needed to effectively utilize and maintain digital health systems. According to a 2023 WHO report, only 25% of LMICs have formal training programs on digital health for healthcare professionals, highlighting the need for targeted investments in workforce development. Addressing the challenges of interoperability, scalability, and sustainability is imperative to unlocking the full potential of technology in transforming healthcare. A coordinated approach involving governments, healthcare providers, technology developers, and private sector investors is essential to creating an interconnected and efficient digital health ecosystem that enhances patient care, optimizes health resources, and drives long-term health improvements globally.

Opportunities in Digital Health Integration

Strengthening Health System Interoperability

The ability to integrate diverse digital health solutions into a cohesive ecosystem allows for real-time data exchange, improved care coordination, and enhanced decision-making. By adopting global interoperability standards such as HL7 FHIR and SNOMED CT, health systems can break down data silos, improve efficiency, and ensure that health records are accessible across various providers and institutions. This fosters a more patient-centered approach and supports evidence-based interventions.

Scaling Digital Health Innovations for Broader Impact

Scaling digital health solutions beyond pilot projects presents an opportunity to expand access to quality healthcare. Many digital initiatives, such as telemedicine, remote monitoring, and mobile health applications, have demonstrated success in localized settings. However, with proper regulatory frameworks, infrastructure development, and investment in digital health literacy, these solutions can be expanded to national and regional levels, ensuring a wider reach and greater impact on health outcomes.

Advancing Sustainable Financing Models

Innovative financial mechanisms, such as blended financing, public-private partnerships, and value-based care models, create opportunities for sustained digital health investments. Governments, private investors, and global health organizations can collaborate to establish long-term funding strategies that reduce reliance on short-term donor support. Sustainable financing ensures that digital health solutions remain operational, continuously improve, and are integrated into mainstream healthcare systems.

Harnessing AI and Emerging Technologies for Smarter Healthcare

Artificial intelligence, machine learning, and blockchain technology offer transformative potential in diagnostics, predictive analytics, personalized medicine, and administrative efficiency. AI-powered decision-support tools can enhance early disease detection, while blockchain can improve data security and transparency. These technologies enable more efficient workflows, reduce human error, and optimize resource allocation, ultimately improving patient outcomes and reducing healthcare costs.

Strengthening Policy and Regulatory Frameworks for Digital Health

Clear and enforceable digital health policies create an enabling environment for sustainable adoption. Governments and regulatory bodies can establish frameworks that support data privacy, cybersecurity, and ethical AI use. Policies that promote interoperability, incentivize digital transformation, and regulate telehealth services contribute to a well-structured digital health ecosystem. A robust policy environment also encourages investment and fosters trust among healthcare providers, technology developers, and patients.

Enhancing Capacity Building and Workforce Development

Investing in digital health literacy and upskilling healthcare professionals ensures that they can effectively leverage new technologies. Training programs, certification courses, and academic curricula focused on digital health can prepare healthcare workers, IT specialists, and policymakers to navigate an increasingly digitalized healthcare landscape. Workforce development strengthens the implementation and sustainability of digital health initiatives.

Expanding Access to Quality Healthcare through Digital Innovations

Digital health bridges geographical and economic barriers to healthcare access. Telemedicine platforms, mobile health applications, and remote diagnostics extend healthcare services to underserved populations, including those in rural and remote areas. Digital tools also empower patients through self-management applications, wearable devices, and real-time health monitoring, improving preventive care and chronic disease management.

Driving Economic Growth and Job Creation in the Digital Health Sector

The expansion of digital health solutions creates opportunities for job creation and economic growth. As health systems increasingly adopt digital tools, there is a growing demand for data scientists, AI specialists, cybersecurity experts, and health informatics professionals. Additionally, digital health startups and innovation hubs can drive economic development by fostering entrepreneurship and attracting investments in health technology. Importantly, these advancements can also support inclusive growth by creating employment opportunities for young people and women, particularly in underserved communities. By investing in digital health education and training programs, countries can build a skilled workforce equipped to meet the demands of a rapidly evolving health-tech ecosystem.

Facilitating Research, Innovation, and Data-Driven Decision-Making

A well-connected digital health ecosystem enables real-time data collection and analytics, supporting research, surveillance, and policymaking. Health data analytics can identify disease trends, improve outbreak preparedness, and optimize resource allocation. Digital registries, electronic health records, and AI-driven insights help governments and organizations develop targeted interventions that enhance public health outcomes.

SESSION OBJECTIVES AND KEY THEMES

- To examine the Role of Interoperability in Digital Health Transformation: Highlight the importance of seamless data exchange, standardized protocols, and regulatory frameworks that enable health information systems to communicate effectively.
- To identify Strategies for Scaling Digital Health Innovations: Explore best practices for transitioning pilot projects into large-scale, sustainable healthcare solutions that drive system-wide impact.
- To assess Sustainable Financing Models for Digital Health: Discuss funding mechanisms, including blended financing, private-sector investments, and government-led initiatives, to ensure long-term viability.
- To leverage AI and Emerging Technologies for Smarter Health Systems: Investigate how artificial intelligence, blockchain, and IoT can enhance decision-making, predictive analytics, and operational efficiency in healthcare.
- To strengthen Policy and Governance for Digital Health Integration: Review existing regulatory frameworks, compliance challenges, and policy strategies for fostering a thriving digital health ecosystem.
- To build Capacity and Strengthen the Digital Health Workforce: Address the need for digital literacy, workforce training, and integration of digital health competencies in medical and public health education.
- To promote Public-Private Partnerships for Sustainable Digital Health Ecosystems: Highlight collaborative models that drive innovation, infrastructure development, and widespread adoption of digital health solutions.

EXPECTED OUTCOMES

- Development of an Interoperability Roadmap for Health Systems
- Blueprint for Scalable Digital Health Infrastructure
- Framework for AI and Emerging Technology Integration in Healthcare
- Technical and Regulatory Alignment for Cross-Border Digital Health Solutions
- Model for Sustainable Digital Health Financing Mechanisms
- Designing a Digital Health Workforce Upskilling Strategy
- Strengthening Cybersecurity and Data Protection in Digital Health Systems
- Post-Event Initiative – ABCHealth Virtual Health Hub (Virtual) (Knowledge Repository, Collaborative Network, Incubation & Acceleration Support, Regulatory Advisory Desk)

AGENDA

1ST KEYNOTE SESSION (VIRTUAL)

THEME

Accelerating Universal Health Care in Africa: Showcasing Australia's Digital Health Foundation Building Blocks

Synopsis of Context

Achieving Universal Health Care (UHC) in Africa demands scalable, interoperable, and resilient digital infrastructure. This session draws lessons from Australia's mature digital health system, spotlighting foundational elements such as electronic health records, secure data exchange, national health identifiers, and governance frameworks that have enabled more equitable access to care. By showcasing how these building blocks have driven efficiency and accountability in Australia, the session aims to offer practical insights and adaptable models that African countries can localize to strengthen their own health systems. Ultimately, it will explore how digital transformation can serve as a strategic enabler for achieving UHC goals across the continent.

Presenter: Mr. Laurie Hawkins - Founder, AITIA Global, Estonia

2ND KEYNOTE SESSION (IN-PERSON)

THEME

Achieving Digital Health Equity in Africa: Overcoming Barriers to Access and Utilization of Health Technologies

Synopsis of Context

As digital health solutions continue to reshape healthcare delivery across Africa, ensuring equitable access and meaningful utilization remains a pressing challenge. This keynote will explore the critical dimensions of digital health equity, from infrastructure gaps and affordability to digital literacy, gender disparities, and inclusive design. It will highlight the importance of aligning innovation with context-specific realities, ensuring that underserved populations are not left behind in the digital transformation of health systems. By examining successful models and policy levers, the session will chart a path toward inclusive digital ecosystems that empower all communities—urban and rural, rich and poor—to benefit from emerging health technologies. The keynote will set the tone for the conference's broader conversations on how to build scalable, sustainable, and equitable digital health systems across the continent.

Presenter: Dr. Adeolu Arogundade - President, Society for eHealth and Telemedicine, Nigeria

KEYNOTE SPEAKER

SPEAKERS' PROFILES

Laurie Hawkins, Founder of AITIA Global, Estonia, has been credited as the “Father” of, and “Advocate” of the digital health initiative, the “National Health Services Directory” (Health Services Libraries internationally) in Australia and facilitated the introduction of the National Healthmap used by numerous state/territory governments, public, private and not for profit organisations. A Health Services Library is a “Yellow-pages” of health and social care services covering the whole eco-system of health, and acts as Provider Directory, store national Health Professional and Organisation identifiers for interoperability, and links to the national HealthMap to allow consumers, researchers, policy makers and health planners to look at insights from Services data combined with the many datasets for the Social Determinants of Health.

Laurie Hawkins
-Founder, AITIA Global

Adeolu Arogundade
-President, Society of
Telemedicine & eHealth
Nigeria.

Dr. Adeolu Arogundade is a distinguished Nigerian healthcare professional with a multifaceted career spanning clinical practice, digital health advocacy, and organizational leadership. He currently serves as the President of the Society for Telemedicine and eHealth in Nigeria (SfTeHIN), a role he has held since November 2020. In addition to his leadership at SfTeHIN, He is an eHealth consultant, operational dive physician, and emergency trauma care doctor. His diverse expertise reflects a commitment to enhancing healthcare delivery through innovative solutions and specialized medical practices. Under his stewardship, SfTeHIN has been instrumental in advancing Nigeria's digital health landscape. Notably, in 2012, the Federal Capital Territory (FCT) invited SfTeHIN to lead a stakeholders' roundtable aimed at developing a digital health strategy and policy document, marking a significant milestone in the nation's digital health evolution

Dr. Leke Ojewale is the Senior Technical Adviser (Digital Health) to the Honorable Minister of Health for the Federal Republic of Nigeria. A dedicated healthcare IT leader and physician informaticist, Dr. Ojewale brings over a decade of experience optimizing electronic health records (EHRs) and driving digital health innovation through the Nigeria Digital in Health Initiative.

AGENDA - 1ST PANEL

Advanced Health Data Governance and Privacy: Navigating AI Integration, Compliance, and Ethical Challenges

Synopsis of Context

As African health systems accelerate their digital transformation journeys, the integration of AI technologies brings forth unprecedented opportunities—and complex challenges. This panel will focus on strengthening health data governance as a foundational step to enabling trustworthy and secure digital health systems. It will explore the interplay between data protection, ethical AI use, and compliance within diverse regulatory environments. Discussions will address issues such as consent, algorithmic bias, cross-border data flows, and the governance frameworks required to ensure that digital health interventions are both impactful and ethically sound. Panelists will highlight how to build resilient digital health infrastructure that prioritizes patient privacy while supporting innovation.

SPEAKERS' PROFILES

Mr. Kenneth Okolie
-CEO, Synlab

Kenneth Okolie is the CEO of SYNLAB Nigeria, a leading provider of medical laboratory services in West Africa. With over a decade of experience in the healthcare sector, Kenneth has built a reputation for driving innovation, operational excellence, and strategic growth within medical diagnostics. He brings deep expertise in healthcare management, business process improvement, design thinking, total quality management, and change leadership. His work has consistently led to improved patient outcomes and organizational performance across the industry. Kenneth holds an MBA from Lagos Business School and completed executive training at INSEAD Business School, with a focus on strategy, finance, and management.

David joined eHealth Africa in March 2022 as the Deputy Director, Programs and Impact, now the Partnerships and Programs Directorate. He oversees the coordination and administration of all new and ongoing projects/programs portfolios across Africa. He drives the program design, program implementation strategy, and designing research and evaluation methods. Before joining eHA, David was the Technical Lead and Deputy Chief of Party for a \$21.5 Million USAID-funded Integrated Child Health and Social Service Award (Lot 1) implemented in Akwa Ibom, Cross River, and Bayelsa States. David successfully led the writing of these awards in recent years: USAID/ICHSSA1 (2019: \$21.5Million); USAID/ICHSSA4 (2019: \$20.5Million); USAID/ACE C4 (2022: \$40Million). He also serves as the lead writer for CCCRN on the 2022 CDC Nigeria RFA: Delivering Comprehensive and Sustainable HIV/AIDS Clinical and Community Services to Achieve HIV Epidemic Control in Subnational Units in Nigeria.

Dr. David Akpan
-Deputy Director,
Partnerships & Programs
eHealth Africa

Kareem Adeniji
-MD, Tabade Pharm. Ltd

Kareem Adeniji is the Managing Director of Tabade Pharmaceutical Chemists Limited, a family-owned Nigerian healthcare company established in 1977. He also serves as the Director of Pharmacy and Director of Laboratory Services at the company. With 16 years of cross-sector healthcare experience, Kareem is an accomplished clinical community pharmacist and biomedical scientist. He is also a public health consultant and market entry specialist, focusing on pharma, AI tools for disease screening, smart AI data platforms, optical imaging and laser devices, biomedical and IVD devices, eye care products, and maternal health. His company currently represents five healthcare companies from Finland in Nigeria and Ghana. Kareem's current project involves embedding AI-enabled fundus cameras for national diabetic retinopathy screening programs in Nigeria and Ghana, in partnership with their respective health ministries.

Dr. Chimezie Uche
-Founder, Greycare NG

Dr. Chimezie is a seasoned entrepreneur and C-suite executive with nearly two decades of experience in Nigeria and West Africa's tech ecosystem, especially in healthcare technology. He has a strong track record in founding and scaling ventures, driving strategic growth, and leading market expansion across B2B and B2I sectors. His core strengths include business strategy, startup scaling, operations management, and stakeholder engagement. Dr. Chimezie is also experienced in venture capital, investment readiness, and mentoring high-performing teams. He brings a results-driven approach to business transformation and long-term value creation.

Shina Arogundade, is a faith-driven entrepreneur and the CEO of Myltura. Before Myltura, he was CEO of Techbeaver, a cutting-edge technology development company that specializes in providing essential technical infrastructures to empower startup founders. With a mission to nurture innovation and drive technological progress, Shina and his team at Tech Beaver have been instrumental in creating several transformative products, including PocketFood, Hytchbuddy, Trade Lenda, Krowdfi, Trade tracka and their latest achievement, Myltura. Shina's commitment to fostering innovation and enabling startups has garnered recognition on both national and international levels.

Shina Arogundade
-Co-Founder, Myltura

Dr. Dorothy Jeff-Nnamani
CEO, Novo Health Africa

Dorothy graduated from the College of Medicine University of Nigeria Nsukka. Driven by a passion for public health, she went on to obtain a Masters degree in Public Health from the University of Lagos. As a public health consultant she participated in various local and international health programmes. In May 2006 she represented DHI in Nigeria's first ever Mothers' Summit held in Abuja. Driven by a need to more specifically impact her community, she undertook a postgraduate program in infectious diseases at the London School of Hygiene and Tropical Medicine, University of London, graduating with an MSc degree. She worked as a Zonal Medical Manager PHB HealthCare in Lagos, Nigeria and is currently the MD/CEO of Novo Health Africa Ltd.

Tosin Ozoya is a visionary healthcare and business consultant with a rich background in pharmacy and extensive expertise across health tech, supply chain management, and regulatory affairs. With years of experience leading successful donor-funded programmes backed by the Gates Foundation and USAID, Tosin has delivered remarkable results across multiple regions, ensuring impactful, sustainable change. Her career has been defined by a relentless focus on improving operational efficiency and spearheading major health initiatives. Tosin has established key operational frameworks that optimise business processes and drive measurable results in healthcare. As a key player at Sare Health Africa, she is driving innovation in the healthtech space.

AGENDA - 2ND PANEL

Strategic Regulatory Pathways for Digital Health Innovation: Data Governance, AI Integration, and Compliance in African Healthcare Markets

Synopsis of Context

The future of Africa's digital health ecosystem hinges on the development of clear, agile, and locally relevant regulatory frameworks that keep pace with innovation. This session will delve into how strategic regulatory models can unlock the full potential of digital health, especially in areas such as telemedicine, AI-driven diagnostics, and mobile health applications. Panelists will examine how harmonized standards, regional cooperation, and adaptive regulation can support the growth of trustworthy technologies while protecting public interests. Case studies and cross-sector insights will be used to unpack how governments, innovators, and regulators can co-create an enabling environment for responsible digital health expansion.

TIME (WAT)	ACTIVITY/PERSONNEL
10:50am - 11:05am	PRESENTATION Session Chair • Dr. Njide Ndili - Country Director, PharmAccess; President, Healthcare Federation of Nigeria (HFN)
11:05am - 11:50am	PANEL DISCUSSION Panelists • Dr. Chibuzor Opara – CEO, DrugStoc • Irene Nwaukwa- Founder/CEO, Infinity Health • Dr. Yemi Dawodu – CEO, Cerba Lancet Laboratories • Dr. Raphael Akangbe – AD, Data Protection Officer, Lagos State Ministry of Health • Chibby Dangana – CEO, Data Factory Global Moderator: Folake Owoduni – CEO, Emergency Response Africa
11:50am - 12:50pm	LAUNCH OF THE ABCHEALTH VIRTUAL HEALTHTECH HUB

SPEAKERS' PROFILES

Dr. Njide Ndili
-Country Director
PharmAccess

Njide Ndili is the Country Director for PharmAccess Foundation in Nigeria, an international NGO with a unique integrated approach that addresses the demand and supply side of the healthcare system, and uses the opportunities that mobile technology and data provides to leapfrog development in the health markets in sub-Saharan Africa. She is the President of Healthcare Federation of Nigeria, a coalition of private sector healthcare associations advocating for the inclusion of private sector in Nigeria's healthcare delivery system; she is a trustee of the Nigeria Healthcare Excellence Award, an annual event that recognises excellent service delivery; and a Board Member of the Society for Quality in Healthcare in Nigeria, an NGO positioning to become the local accrediting body for healthcare institutions in Nigeria.

Folake Owodunni is the Co-founder and CEO of Emergency Response Africa (ERA), a healthcare technology company that is changing how medical emergencies are managed in Africa, beginning in Nigeria. ERA saves lives by connecting individuals experiencing a medical emergency to the largest network of Community First Responders, ambulances, and hospitals to deliver care in minutes using technology. ERA recently partnered with the Edo state government to improve the state's responsiveness to medical emergencies in the public sector. ERA has been recognised for the work it is doing in providing technology-enabled care, including features in national newspapers and leading technology publications.

Folake Owodunni
CEO
Emergency Response
Africa

Irene Nwaukwa
Founder/CEO
Infinity Health

Irene Nwaukwa is the CEO and Founder of Infinity Health Africa, a pioneering Market Access- as-a-Service company leveraging technology to accelerate healthcare access across Africa. She brings over 16 years of experience in market access, commercial operations, and healthcare innovation, having held leadership roles at global companies including Sanofi, Boehringer Ingelheim, and the African genomics company 54gene. Irene has successfully led product launches, regulatory strategies, and growth initiatives across 15 Sub-Saharan African countries. Her work sits at the intersection of health policy, technology, and business—driving practical, scalable solutions for healthcare and life science companies navigating complex, underserved markets.

Dr. Yemi Dawodu
-MD/CEO
Clina Lancet Laboratories

Dr Olayemi Dawodu is the MD/CEO Clina-Lancet Laboratories a household name in the healthcare space and a part of the Cerba-Lancet Healthcare group, she started her career with the organization in 2015 as the country Histopathologist where she built the trust of fellow consultants and effectively managed the histopathology unit before being promoted to her current position in 2016. She is a Board member of Clina- Lancet Laboratories, Nigeria. She is a Anatomic and Molecular Pathologist who holds an M.B.B.S from the College of Medicine, University of Lagos, as well as fellowships in Pathology (Anatomic and Molecular Pathology) and Laboratory Medicine of the National Postgraduate Medical College of Nigeria and West African College of Physicians respectively, which makes her eligible to practice in Nigeria and the West African region.

Chibby Dangana, Founder of Data Factory Global, is a distinguished digital transformation leader with over 15 years of experience advancing organisational growth through innovative Data strategies. She has a proven track record of aligning technology investments with business objectives, using data-driven insights to optimize operations, accelerate decision-making, and deliver measurable impact. Her expertise spans both private and public sectors, where she has championed initiatives that drive sustainable development and systemic change. Deeply committed to social impact, Chibby has empowered numerous non-profit organisations—particularly in strengthening health systems—by promoting data as a tool for evidence-based decision-making. She excels in senior stakeholder engagement and high-level advocacy, catalysing innovation and inclusion at scale.

Chibby Dangana
Founder/CEO
Data Factory Global

Dr. Raphael Akangbe
-Data Protection Officer
LsMoH

Dr. Raphael Akangbe is a renowned digital health expert and the Data Protection Officer at the Lagos State Ministry of Health. He holds a Ph.D. in Digital Health and Health Informatics, with certifications in Data Analytics, Cybersecurity, and Data Protection. Blending academic rigor with practical expertise, Dr. Akangbe has authored three influential books and was named among the Top 50 Global Thought Leaders on Big Data and Health Tech in 2024. He serves as a research reviewer for Frontiers and a research consultant at the Norxin Biotechnology Research Center in China. A board member of the Society for Telemedicine and e-Health in Nigeria (SfTeHiN), he is a leading authority in EMR, EHR, and Telemedicine. As a mentor, researcher, and strategic consultant, he is dedicated to advancing digital health ecosystems, with a focus on data-driven healthcare transformation across Africa and globally

Dr Chibuzo Opara is the co-founder and CEO of DrugStoc, a Pharmatech platform that provides access to verified quality pharmaceutical and healthcare products for healthcare facilities and pharmacies. DrugStoc is focused on eliminating counterfeit and substandard drugs, expanding access to pharmaceutical products for healthcare providers, and improving transparency in pricing for the healthcare product supply chain at the last mile. Chibuzo is a health economist with a clinical background and over 20 years of experience in the health sector. He has worked with the World Health Organisation, the World Bank and the International Finance Corporation, the European Development Fund, and the Sovereign Wealth Fund among other institutions in the fields of healthcare finance and supply chain management.

LAUNCH OF THE ABCHEALTH VIRTUAL HEALTHTECH HUB

@ABCHealth Digital Health
Conference
JUN 3 2025

WHX Main Room (Showfloor)
Landmark Event Centre, Lagos.

BRIEF

INTRODUCTION

Africa's healthcare industry is undergoing a transformative shift, driven by technological advancements that enhance patient care, improve healthcare delivery, and streamline operational processes. The emergence of virtual healthcare solutions, telemedicine, AI, and digital health tools presents an unprecedented opportunity for innovation in the sector. To foster collaboration, innovation, and growth in this space, ABCHealth is launching a Virtual Health Tech Hub. This launch will birth a dynamic and interactive digital ecosystem that will foster networking among startups, industry professionals, healthcare providers, technology developers, and policymakers. It will serve as a knowledge-sharing platform, a space for networking, incubation & acceleration support, a regulatory advisory desk and a launch pad for the next generation of health technology innovations.

In short order, this Hub is a forerunner of the ABCHealth Academy for Health Entrepreneurs, which will be a platform to coordinate and deepen health tech interventions and solutions, connecting the players and pioneers to their peers from other parts of the world. The launch details are:

- **Date** - June 03, 2025
- **Time** - 11:50amWAT
- **Venue** - Landmark Centre, Victoria Island, Lagos Nigeria

OBJECTIVES

The primary objectives of the Virtual Health Tech Hub are:

- To formally announce the Hub, leveraging state-of-the-art digital systems to showcase the value inherent in the virtual ecosystem and creating a safe space for networking and intellectual discussions aimed at improving health outcomes.

- To promote collaboration through convening health stakeholders in various sectors including finance, logistics, policy and leveraging the Coalition's global exposure and influence in order to solve critical health challenges
- To entrench responsibility and trust for early-stage health tech startups to access resources, mentorship, and funding opportunities to scale their solutions through a Dragons' Den-like platform
- To aggregate online resources to upskill professionals and stakeholders in the healthcare and technology sectors on the latest trends, tools, and best practices in health tech.
- To support access to Africa's health market through identifying opportunities for health tech companies to highlight their products and services to healthcare providers, investors, and decision-makers.
- To leverage pioneers' knowledge in creating the necessary regulatory frameworks that are intrinsic to stakeholders' understanding of roles and responsibilities in creating an ecosystem for health innovation to thrive

HEALTH TECH VIRTUAL HUB LAUNCH FORMAT

The launch will feature a short fireside chat focused on the value proposition of the Hub led by the Host/Moderator, Chibby Dangana, Founder, Data Factory Global, other speakers include:

- Dr. Chibuzo Opara - CEO, DrugStoc
- Dr. Obinna Nnewuihe - Interim Head, Nesta Ventures, Healthtech Thematic Group Lead, NESG

Guardians to engage health entrepreneurs and these include:

- Odunayo Sanya – ED, MTN Foundation
- Dr. Chibuzor Opara – CEO, DrugStoc
- Dr. Olayinka Adewunmi – Ag Director ITMO – Unilag
- Ilerioluwa Brown – Director – Product Dev – Moniepoint
- Dapo Otunla – Director - IHS

PROPOSED PLATFORM

The virtual hub is being proposed to be managed via an app and this is in line with the fact that many virtual hubs - whether for remote teams, events, or communities - are increasingly being managed through apps to provide users with a seamless and interactive experience. This virtual hub app will allow users collaborate, interact, share resources, and access services remotely.

AGENDA

TIME	ACTIVITY/PERSONNEL
11:50am - 12:50pm	LAUNCH OF THE ABCEALTH VIRTUAL HEALTHTECH HUB Topic: Catalyzing a New Era of Health Innovation in Africa: Empowering Local Talent and Advancing Digital Technologies
11:50am - 11:55am	ABCHealth Video Interlude
11:55am - 12:00noon	Introduction / Setting the Tone Adekunle Dalton-Oke - Communications Lead, ABCHealth
12:00noon - 12:35pm	Fireside Chat Host/Moderator: • Chibby Dangana – CEO, Data Factory Global Speakers: • Dr. Chibuzor Opara – CEO, DrugStoc • Dr. Obinna Nnewuihe – Healthtech Thematic Group Lead, Nigerian Economic Summit Group (NESG)
12:35pm - 12:45pm	APP Live Demo Unveiling the Virtual Hub Web Application
12:45pm - 12:55pm	Meet ABCHealth Health Tech Hub Vanguard • Odunayo Sanya – ED, MTN Foundation • Dr. Chibuzor Opara – CEO, DrugStoc • Dr. Olayinka Adewunmi – Ag Director ITMO – Unilag • Ilerioluwa Brown – Director – Product Dev – Moniepoint • Dapo Otunla – Director - IHS
12:55pm - 1:00pm	Responses, Questions and Next steps END Transition back to the Digital Health & AI Conference
1:00pm - 2:00pm	BREAK

Degree (with Honors; Dean's List) and a Certificate in Management from Northwestern University's School of Law and Kellogg Graduate School of Management, respectively. He is admitted to practice at the Bars of the Federal Republic of Nigeria and the State of New York, The Commonwealth of Massachusetts, the District of Columbia, and the State of Illinois (Inactive Status) in the U.S

AGENDA - 3RD PANEL

Driving Investment in AI and Digital Health: Unlocking Value, Scalability, and Innovation in Healthcare Systems

Synopsis of Context

Investment remains a critical catalyst in the scale-up of AI and digital health technologies across Africa. Yet many promising innovations struggle to move from pilot to scale due to fragmented funding landscapes and limited investor confidence. This session will explore innovative financing mechanisms, investor expectations, and the pathways to commercial viability that can help digital health solutions achieve widespread adoption. Speakers will address how governments, development partners, and private investors can align efforts to drive value-based investment, support market readiness, and ensure health equity. It will also explore how investment in infrastructure, talent, and capacity-building is essential to unlocking the full potential of AI in healthcare delivery.

SPEAKERS' PROFILES

Adam Thompson
-CEO, EHA Clinics

Adam Thompson is an innovator, strategic disruptor, and transformation specialist. Adam is recognized for his exemplary leadership, innovative mindset, communication skills, and proven track record of success. Adam believes in the transformative power of the public, private, and nonprofit sectors working together. He believes that as local and global communities, we can reimagine sustainable financing for public health delivery systems, strategically deploy new medical technologies, and accelerate equitable access to lifesaving services. Adam has over 20 years of professional experience and brings a unique perspective in shaping new ideas to tackle our most significant global challenges. Experience includes: Current positions as the CEO at EHA Clinics, a start-up health company in Nigeria, and President at eha Impact Ventures, a philanthropic impact investing organization.

A distinguished healthcare executive, visionary entrepreneur, and advocate for healthcare transformation in Nigeria. He is the Co-founder and Chairman of Echolab Radiology and Laboratory Services and CEO of BCA Healthcare Ltd, where he leads numerous hospital and diagnostic center projects nationwide. With Doctorate degrees in Medical Imaging and Healthcare Administration, Dr. Benson has driven innovation in medical diagnostics and strategic healthcare delivery for three decades. Passionate about digital health, he is the Co-founder and CEO of Ception Health, an integrated, interactive PACS and EMR technology focused on patient-centered care. Dr. Benson is also a thought leader within national and international health policy platforms, contributing to the NESG as the Team Lead for Health as business thematic group in the Health Policy Commission and Vice President-1 of the Healthcare Federation of Nigeria.

Dr. Ayodele Benson
-Chairman
EchoScan Services

Unoma Grant
-COO, Paelon Memorial
Hospital

Unoma Grant is a healthcare administrator and green gains champion with a unique background in engineering, operations, and innovation. She serves as Chief Operating Officer and Chief Sustainability Officer at Paelon Memorial Hospital in Lagos, where she leads strategic operations and integrates sustainable practices into clinical and administrative systems. Unoma is a certified EDGE Expert, Mechanical Engineer, and AI enthusiast who brings a systems-thinking approach to tackling the increasingly complex challenges in Nigeria's healthcare space. She is the co-founder of the Women in Healthcare Network (WIHCN), which advances female leadership and equity across the health sector. Beyond healthcare, she leads multiple creative ventures, including De Sign Plus and Twinkle Locs, reflecting her passion for blending strategy with creativity. Unoma is deeply committed to transforming Nigeria's healthcare systems through innovation, sustainability, and empathy.

Abiola Oshunniyi
-Program Manager
(Digital Health) CHAI

Abiola Oshunniyi is a tri-sector serial innovator, futurist, and strategist with over a decade of experience spanning the financial services, health, international development, public policy, business management, and governance. His expertise lies in developing innovative strategies, driving sustainable growth, developing capacity, and building strong partnerships while leading or supporting diverse teams to deliver high-impact solutions. Throughout his career, he have successfully designed, led, and supported complex multi-million-dollar projects funded by renowned organizations such as the World Bank, USAID, the UK Government, and the Bill and Melinda Gates Foundation. His work has spanned various regions, where he has played a pivotal role in enhancing health security, strengthening systems, and promoting sustainable practices.

At the helm of AXA Mansard Health, Mr. Tope Adeniyi focus lies in advancing the wellbeing of the members by providing superior healthcare solutions. His tenure has been marked by leveraging competencies in problem solving and financial risk management to cultivate the largest and most valuable health insurance entity in Nigeria and West Africa. Prior to this role, as Divisional Director at Mansard Insurance, he has been instrumental in establishing robust operational and technological frameworks, ensuring integrated services and spearheading process improvements. His dedication to operational excellence and customer satisfaction continues to drive the team's success in delivering unparalleled service.

Mr. Tope Adeniyi
-CEO, AXA Mansard
Health

Dr. Funmi Adewara
-CEO, Mobihealth
International

Dr. Funmi Adewara is a mutli award winning British-Nigerian physician, Cambridge-trained bioscience entrepreneur, and the Founder/CEO of fadt growing integrated telehealth startup company. Funmi has over 15years post graduate experience in clinical medicine in NHS UK, pharmaceuticals, and business development in Oil/Gas and energy sector. Leading a pan-African telehealth revolution, her venture, Mobihealth, provides telehealth solutions via mobile phone, computers, AI, satellite and solar powered telehealth clinics connecting patients in urban and rural areas to a global and local network of doctors, genuine medicines and diagnostics —helping to mitigate the impact of emigration, reduce geographical barriers, and lower treatment costs. Mobihealth has impacted over 200,000 lives, with a goal of reaching 1 million annually.

Dr. Jekwu Ozoemene is a finance executive, and public intellectual with over 26 years' experience across banking, fintech, consulting, and development. He is a Group Executive at The Alternative Bank, and the immediate past CEO of the HIV Trust Fund of Nigeria (HTFN) and the Nigeria Business Coalition Against AIDS (NiBUCAA). He serves on the Africa-led HIV Control Working Group (a 12-man Pan African Think-Tank hosted by the Centre for Infectious Disease Research in Zambia - CIDRZ and funded by the Bill and Melinda Gates Foundation - BMGF). He represents FMO on the board of Business Partners International Africa LLC (BPIA), chairing its Audit & Risk Committee and serving on its HR Committee. He also represents Oikocredit International on the board of Ghana's largest and leading fintech, Zeepay Ghana Limited (operating in over 26 countries), where he chairs both the Audit, Risk & Compliance and Strategy, Finance & Investment Committees.

Dr. Jekwu Ozoemene
-Executive Director
Alternative Bank

AGENDA - 4TH PANEL

Innovative Digital Health Ecosystems: Leveraging Public-Private Partnerships for Sustainable Digital Health Solutions and Improving User Experience in Africa

Synopsis of Context

Collaboration across sectors is vital for the long-term success of digital health in Africa. This session will examine how innovative digital health ecosystems, anchored in strong public-private partnerships—can improve service delivery, strengthen health outcomes, and enhance user experiences. Drawing from successful models, the discussion will highlight how governments, tech innovators, development partners, and healthcare providers can co-create scalable, patient-centered solutions that address local needs. Key focus areas will include interoperability, affordability, digital literacy, and user-centric design. The session aims to promote sustainable ecosystem development that aligns with national health priorities while embracing innovation and inclusivity.

- The eight (8) finalists will pitch at an in-person event during the WHX – Lagos 2025 in Nigeria; their pitch will comprise a five-minute presentation followed by ten minutes Q&A by the members of the jury and a panel of investors.
- Expected attendance at the pitch finals include venture capitalists, angel investors, entrepreneurs and development institutions.
- Each step of the process will be endorsed by ABCHealth and overseen by one of the Big Four consulting organizations to guaranty the credibility of the program.
- Prizes include a paid trip to Dubai for the winner while the first and second runner-ups. Other intangible benefits include visibility for all finalists opening them to future investment opportunities.
- The pitch finals will take place on June 4, 2025 at the World Health Exhibition – Lagos 2025 from 9:00amWAT in Room 2A within the main exhibition hall.
- Winners will be unveiled at the end of the pitching session following deliberations by the judging panel.

OBJECTIVES

- To discover start-ups with groundbreaking healthcare innovations that address key issues in the African healthcare sector.
- To support start-ups with opportunities that will help them access funding, mentorship, and networking opportunities.
- To accelerate the scaling of health-focused businesses and solutions with high potential for social impact.

ELIGIBILITY

- The program is open to health-focused startups and early-stage companies across West Africa.
- The start-ups must be working on solutions that address healthcare challenges in one or more of the following areas: artificial intelligence, generative AI, telemedicine, AR & VR, screening & diagnostics, disease management, drug discovery, data management, disease prevention, treatment, access to healthcare, mental health, healthcare technology, health logistics, pharmaceuticals, health education and other health or social determinants of healthcare areas.
- Applicants should demonstrate a viable business model with clear potential for growth and scalability.

SCREENING COMMITTEE

The Screening Committee will serve as first level assessors to select the entries that will feature on the pitch day.

Over the course of two weeks from May 12 to May 23, members of the Screening Committee will review a maximum of thirty (30) of the most qualified entries. These thirty entries will be the outcome of initial sorting process by ABCHealth who will work to remove entries that do not meet the baseline requirements as indicated to applicants during the application stage.

The core expectation from Steering Committee members at this point will be to score each entry according to the criteria stated in the grading sheet, which will be provided in due course.

Grading will commence on Monday 12 May 2025 and will be conducted over two-week period; it is our expectation that all members of the Screening Committee will have gone through all the entries and submitted their sheets on or before Friday May 23 2025.

The Screening Committee is comprised of high-level professionals in various fields and industries. They are:

1. **Odunayo Sanya** – Executive Director - MTN Foundation
2. **Dr. Tinu Akinbolagbe** – CEO – PSHAN
3. **Dr. George Uduku** – General Manager, West Africa – GE Healthcare
4. **Ms. Mary Egbas** – MD – Goldstarr Group
5. **Dr. Jekwu Ozoemene** – Executive Director - Alternative Bank
6. **Mr. Kenneth Okolie** - CEO - Synlab
7. **Dr. Justice Derefaka** – Asset Manager, Production Sharing Contract, NNPC Upstream Investment Stream (NUIMS)
8. **Dr. John Adesioye** – President/CEO, Utopian Consulting International
9. **Mrs. Fola Laoye** – CEO, Iwosan Investments

The criteria for screening the entries will be based on the following key considerations including:

- **Innovation:** The creativity and novelty of the solution.
- **Impact:** The potential for the solution to improve healthcare outcomes and access across Africa.
- **Scalability:** The potential for the business to grow and expand across multiple African markets.
- **Feasibility:** A clear roadmap for implementation, sustainability, and financial viability.

GRADING POINTS	GRADE
The Big Idea	
Impact and Innovation: Did they discuss the transformative potential and innovative aspects of the product?	
Market Disruption: Does the idea have the potential to disrupt existing markets?	
Target Market	
Customer Identification: Who are the primary customers? How well-defined is the target audience?	
Market Size and Growth: Is the target market large and expanding?	
Problem Definition	
Importance and Urgency: Was the problem presented as significant and urgent?	
Relevance: How relevant is the problem to the target market?	
Market Opportunity	
Market Validation: How well has the market been validated for urgency or need?	
Customer Demand: Is there evidence of strong customer demand?	
Solution Effectiveness	
Innovativeness: Does the solution employ new technologies or innovative approaches?	
Competitive Superiority: Is the solution better, faster, or more cost-effective than existing alternatives?	

GRADING POINTS	GRADE
Sales & Go to Market Strategy	
Customer Acquisition: How clearly articulated is the strategy for acquiring customers?	
Scalability: Is the strategy scalable and adaptable to new markets?	
Business Model	
Revenue Potential: Does the model demonstrate potential for significant and recurring revenue?	
Sustainability: Is the business model financially and operationally sustainable long-term?	
Market Differentiation	
Unique Selling Proposition: How unique is the product/solution in the market?	
Competitive Edge: Was the competition addressed, and does the company have a discernible competitive advantage?	
Team / Credibility: How credible and qualified is this team to execute their vision? Do they have what it takes to go to the next level?	
Team Credibility: How credible and qualified is the team to execute their vision?	
Execution Capability: Does the team have the necessary skills and resources to take the product to the next level?	
Pitch Quality	
How would you rate the pitch? Was it clear and thorough? Did they stick to the time, and were any fielded questions handled adequately?	

JUDGES PANEL

The Judging Panel will serve as last level assessors and will select the winner, first runner-up and second runner-up on the pitch day. Following the two-week screening exercise, a final list of eight (8) entries will be selected and invited to participate in the pitch contest on June 4 at the Landmark Centre, Victoria Island, Lagos on the margins of the World Health Expo – Lagos 2025. The core expectation of the Judges is to select the winning start-ups who will go on to represent the region at the finals in Dubai alongside other finalists across Africa's five regions (winner); with cash prizes of USD1,300 (first runner-up) and USD800 (second runner-up)

This Panel is comprised of high-level professionals in various fields and industries. They are:

1. **Barrister Ayodeji Adedipe** – Senior Advocate of Nigeria –Panel Chair
2. **Mr. Ilerioluwa Brown** – Director of Product – MoniePoint
3. **Prof. Bongo Adi** – Prof. of Economics – Lagos Business School
4. **Prof. Olayinka Adewumi** - Research & Development - UNILAG - Asst. Professor, Mech-Eng.
5. **Ms. Oghogho Makinde** – Partner, Aluko & Oyeboode
6. **Dr. Akinwumi Fajola** – Country Health Manager – Shell
7. **Dr. Banke Odunsi** – Head, Digital Health, Ministry of Health, Lagos State
8. **Mr. Zakari Momodu** – Director, Aliko Dangote Foundation
9. **Mr. Dapo Otunla** – Director, IHS Towers

Judges will be expected to perform key roles including:

- Participating in the live pitch session on June 4, 2025
- Assessing each startup's live presentation against a set of professional judging criteria provided in preparation for the Pitch session
- Selecting the overall winner and two runner-ups based on scoring and deliberations
- Providing feedback where necessary to encourage startup growth and development The criteria for judging the entries will be based on the following key considerations including:
 - Innovation: The creativity and novelty of the solution.
 - Impact: The potential for the solution to improve healthcare outcomes and access across Africa.
 - Scalability: The potential for the business to grow and expand across multiple African markets.
 - Feasibility: A clear roadmap for implementation, sustainability, and financial viability.

INVESTORS GUILD

A Guild of Investors from different parts of the world will participate in the pitch program in hybrid mode and they will also engage the start-ups during the Q&A Session. The guild will comprise investors such as:

1. **Mr. Kenneth Okolie** – CEO, Synlab
2. **Slava Sazhin** – Founder, Doctoratwork.com
3. **Temil Adelana** – Founder, Herlign
4. **Bolaji Lawal** - CEO, Ecobank Nigeria
5. **Dr. Juliet Ehimuan** - Founder, Beyond Limits Africa
6. **Dr. Peter Billingsley** – Founder, The Vital Narrative

PRIZES AND BENEFITS

- **Grand Prizes:** A pitch alongside regional winners in Dubai; USD1,300 for the first runner-up and USD800 for the second runner-up
- **Visibility:** Opportunities to showcase solutions to key stakeholders including investors and governments and a large audience
- **Mentorship:** Access to a network of experienced mentors and healthcare experts under the ABCHealth Academy for Health Entrepreneurs
- **Capacity Building:** Training and resources to strengthen business skills, product development, and market entry strategies under the ABCHealth Academy for Health Entrepreneurs

The ABCHealth Healthtech Summit is in full swing, catalyzing dynamic conversations and bold partnerships that shape the future of health innovation in Africa. Organized by the African Business Coalition for Health (ABCHealth), this landmark gathering unites health leaders, policymakers, innovators, and private sector actors under one purpose: to accelerate scalable, tech-driven healthcare solutions for the continent.

We kick off on Monday, June 2, with the CAMA Malaria & Tech Workshop (Room 2A – Second Floor). Led by the Corporate Alliance on Malaria in Africa (CAMA)—a coalition of private sector organizations hosted by ABCHealth—this session delves into the theme: “Mobilizing Corporate Resources and Private Wealth for Sustainable Malaria Solutions: Leveraging Technology for Impactful Partnership.” It brings together global health experts, policymakers, pharmaceutical leaders, and development partners to co-create strategies that harness innovation and technology in the fight against malaria.

On Tuesday, June 3, the Summit shifts to the WHX Lagos Showfloor Mainroom for the Digital Health & AI Conference. Under the theme “Engaging the Digital Health Ecosystem: Enabling Interoperability, Scalability and Sustainability across Health Systems,” this flagship event features two keynote addresses, including one by Professor Yemi Osinbajo, former Vice President of Nigeria and Guardian of the Timbuktoo Africa Innovation Foundation, as well as four panel sessions. Core topics include digital infrastructure, interoperability, AI-powered healthcare delivery, and innovative financing mechanisms, all aimed at scaling and sustaining digital health solutions.

Also on Tuesday, ABCHealth officially launches its Virtual Health Tech Hub, a transformative digital platform unveiled in a session titled “Catalyzing a New Era of Health Innovation in Africa: Empowering Local Talent and Advancing Digital Technologies.” Through a live demo experience, participants explore how the hub connects innovators, funders, researchers, and implementers across Africa’s health value chain, driving real-time collaboration and knowledge exchange in a secure and inclusive space.

The momentum continues on Wednesday, June 4, with the Xcelerator Pitch Event (Room 2A – Second Floor), where selected digital health entrepreneurs showcase breakthrough innovations before a distinguished panel of judges, investors, strategic partners, and global development observers. The Xcelerator is a springboard for high-impact solutions, designed to gain visibility, forge partnerships, and accelerate growth for Africa’s next generation of health tech leaders.

Each event in the ABCHealth Healthtech Summit reflects our collective ambition: to build a resilient, inclusive, and tech-enabled health ecosystem for Africa. Through open dialogue, visionary leadership, and concrete collaboration, we are driving the momentum that will shape the continent’s health future.
